Professional Summary

Results-driven MERN Stack Developer with proven experience taking full-stack features from idea to production in fast-paced enterprise environments. Strong expertise in building scalable, high-performance applications using MongoDB, Express.js, React.js, Node.js, and modern AI integrations. Deeply committed to end-to-end feature ownership, debugging complex issues across the stack, and delivering reliable, user-centric solutions. Adept at translating ambiguous business problems into practical, secure technical implementations.

Technical Skills

Frontend: React 19, Next.js 16, Vite, Tailwind CSS v4, Zustand, Framer Motion, React Router v7
Backend & DB: Node.js, Express.js, MongoDB, PostgreSQL, Supabase, Prisma ORM, RESTful APIs, Core Java
Tools & Concepts: Git, Groq LPU, Redis (Upstash/Vercel KV), Zod, RBAC, AI-Assisted Engineering, Full-Stack Debugging

Professional Experience

Brandworks Worldwide Nov 2025 – Sep 2026
Software Developer *Remote / India*

- Owned end-to-end development of core features for a flagship B2B SaaS platform, architecting solutions from scratch using React.js, Tailwind CSS, Node.js, and Express.js.
- Engineered data-heavy product logic and secure workflows, integrating Prisma ORM and databases to handle real-time inventory management and secure e-signature pipelines.
- Collaborated with cross-functional stakeholders to understand user problems, translating requirements into production-ready product improvements.
- Debugged critical issues across frontend interfaces, backend APIs, and database layers, maintaining high reliability and system stability.
- Integrated AI tools into daily engineering workflows to accelerate development, write cleaner code, and manage automated deployments effectively.

White Soft Info Apr 2025 – Sep 2025
Web Developer Trainee *Remote / India*

- Built and shipped dynamic, highly responsive frontend web interfaces utilizing React.js and Tailwind CSS, directly improving customer workflows and overall user engagement.
- Engineered robust backend REST APIs and optimized data routing using Node.js, Express.js, and MongoDB to ensure seamless, scalable data flow.
- Took ownership of diverse technical problems, navigating ambiguity to deliver features that solved actual business context needs.
- Identified and resolved production bottlenecks by debugging across the full stack, continually improving product flows and cross-browser compatibility.

Projects

Mankray - Enterprise Procurement & VMS | *MongoDB, Express.js, React 19, Node.js, Vite*
Live: Mankray-app.vercel.app | Source: github.com/ManojBarmase/Task

- Architected a full-stack Enterprise Procurement and Vendor Management System utilizing the MERN stack to automate purchasing workflows and manage contract lifecycles.
- Digitized the purchase request lifecycle with a multi-tier approval system and implemented dynamic RBAC across 5 distinct user roles to strictly separate concerns.
- Developed a centralized vendor onboarding module and built an intuitive analytics dashboard to monitor spending trends and mitigate contract expiration risks.
- Delivered a highly responsive frontend utilizing React 19 and Vite, leveraging Axios for robust API integrations with custom Express.js/Node.js microservices backed by MongoDB.

AI-Powered Mock Interviewer (Low-Latency AI) | *Next.js 16, Supabase, Groq LPU, Zustand*
Source: github.com/manojbarmase/ai-interviewer-app

- Architected a full-stack AI interviewing platform, implementing a custom pdf-parse pipeline to ingest CVs and generate hyper-personalized interview flows.
- Optimized conversational latency by migrating to Groq LPU, resolving high TTFT bottlenecks to achieve sub-second response times for human-like interaction.
- Built robust serverless endpoints using Next.js 16, Supabase PostgreSQL, and Prisma ORM, secured by custom rate-limiting middleware via Redis (Upstash/Vercel KV).
- Crafted a highly responsive, animated frontend utilizing React 19, Tailwind CSS v4, Framer Motion, and Zustand, featuring interactive Recharts feedback dashboards.

Education

Rajiv Gandhi Proudyogiki Vishwavidyalaya (RGPV) 2020 – 2024
B.Tech in Computer Science *CGPA: 7.57/10*

Certifications

Web Development Certification - Infosys Springboard (Dec 2024)
Core Java Training - Sage University, Sage Winter School (Jan 2022)
